

Anti-theft software card activation process

Function description:

1. For users who already have comprehensive equipment + G3, they have already supported the anti-theft function of Mercedes-Benz, BMW, Volkswagen, Audi and Porsche, and can purchase anti-theft cards and add anti-theft software of more than 100 other brands.

2. For users who only have comprehensive equipment, they can purchase G3 and anti-theft cards, and add anti-theft software for more than 100 brand models, including Mercedes-Benz, BMW, Volkswagen, Audi and Porsche.

Anti-theft card upgrade can upgrade the equipment to the software configuration of anti-theft products. For the anti-theft function of vehicle, it will support more anti-theft password reading, key matching, anti-theft ECU replacement, ECU cloning and other functions in breadth and depth.
